RIZBI ISLAM

Software Quality Assurance (SQA) Engineer

rizbi.cse@gmail.com | +880 1609-084529 | Dhaka, Bangladesh
LinkedIn: linkedin.com/in/rizbi-islam | GitHub: github.com/rizbi-islam, github.com/rizbiislam | Portfolio: rizbi-islam.github.io/profile

PROFESSIONAL SUMMARY

SQA Engineer with hands-on, production experience in manual testing, API testing, and automated performance/load testing, including work on national government platforms in Bangladesh. Skilled in Postman/Newman for REST API validation and Locust for automated load testing. Currently expanding into UI test automation (Playwright, Cypress, Selenium) through self-directed projects. Strong foundation in defect lifecycle management, Agile/Scrum delivery, and cross-functional collaboration.

TECHNICAL SKILLS

- **Manual Testing:** Functional, Regression, Smoke, UAT, Cross-Browser Testing
- **API Testing:** Postman, Newman, REST API Validation
- **Performance / Load Testing:** Locust (Python) — script-based load automation, Apache JMeter
- **UI Automation (In Progress):** Playwright, Cypress, Selenium WebDriver, TestNG, Pytest — self-directed learning
- **Languages:** Python, JavaScript, Java
- **Reporting & Tools:** Allure Reports, TestRail, HTML Reports, Git/GitHub, GitHub Actions
- **Methodologies:** Agile/Scrum, SDLC/STLC, Page Object Model, Data-Driven Testing, Defect Lifecycle Management

PROFESSIONAL EXPERIENCE

IT Executive & QA Engineer | *RK Software (Bangladesh) Limited, Dhaka*
March 2025 – Present

- Performed manual testing (functional, regression, smoke) across full-stack web applications.
- Conducted REST API testing and validation using Postman.
- Designed and ran automated load tests using Locust (Python), simulating concurrent user traffic to surface backend bottlenecks.
- Managed the full defect lifecycle — reporting, root-cause tracking, retesting, and sign-off coordination with developers.
- Provided QA support on two government system upgrade projects (see Key Projects below).

QA Engineer (Part-time) | *IT Directorate, Bangladesh Army — Remote*
March 2024 – November 2024

- Performed manual and functional testing of application workflows.
- Executed performance and load testing using JMeter and Locust to validate system reliability under load.
- Supported automated test execution using Selenium WebDriver with Python.

- Participated in Agile/Scrum sprints, collaborating with cross-functional development teams.

KEY PROJECTS (PROFESSIONAL)

Revenue Management System Upgradation & Maintenance — Dhaka North City Corporation (DNCC)

- Provided QA support across two phases of a live government revenue platform upgrade — including manual and regression testing to verify system stability and accurate automated revenue processing.

RK Courier Delivery Management System

- Conducted Locust-based load testing on a production delivery-management platform; identified 6 critical performance and reliability issues under concurrent user load, with findings that directly informed backend optimization priorities. (Specific technical details withheld per employer confidentiality.)

PERSONAL PROJECTS (SELF-DIRECTED LEARNING)

Independent projects built to develop UI test automation skills — not affiliated with an employer.

Automation Exercise Testing — Playwright Framework — *github.com/rizbiislam/AutomationExercise_testing*

- Built a Playwright suite covering registration, login, product browsing, cart, and checkout.
- Cross-browser execution (Chromium, Firefox, WebKit) with Allure HTML reporting and auto screenshot/trace capture on failure.

Automation Exercise Testing — Cypress + POM — *github.com/rizbiislam/Automation-Exercise-testing-with-Cypress*

- POM-architected framework with strict separation of locators, actions, and test data.
- Data-driven testing via JSON fixtures; GitHub Actions CI/CD pipeline configured for this personal project.

OpenCart E-Commerce Automation — *github.com/rizbiislam/OpenCart-Automation*

- Automated e-commerce flows — product search, cart management, registration, checkout — using Selenium WebDriver, Java, and TestNG.

EDUCATION

Bachelor of Science — Computer Science & Engineering (CSE)

Daffodil International University, Dhaka, Bangladesh | Graduated 2023

Higher Secondary Certificate (HSC) — Science, Dhaka Board (2018)

Secondary School Certificate (SSC) — Science, Dhaka Board (2016)

CERTIFICATIONS

- SQA: Manual and Automated Testing — ostad.app (2023)
- API Testing with Postman — Udemy
- Playwright Test Automation — Test Automation University
